

DESCRIPTION

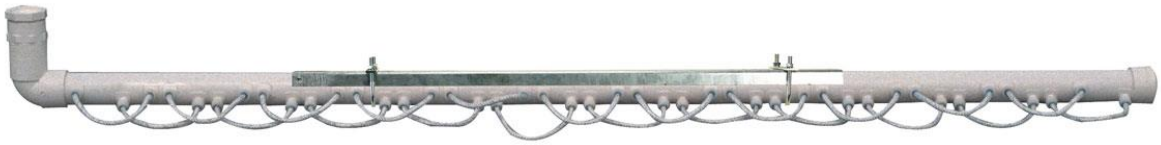

PRODUCT NAME:	WICK WIPER 3MT C/W B PLATE
PART NUMBER:	48930BP
BARCODE:	93276020000636
CATEGORY:	A

PRODUCT FEATURES

DURABLE PVC CONSTRUCTION
PISTACHIO ROPE WITH COMPRESSION GROMMETS
2MTR STEEL BACKING PLATE

BENEFITS

Tough chemical resistant PVC Boom
To allow the herbicide to be drip free
For various mounting options

SPECIFICATIONS**CONSTRUCTION**

- 3mtr PVC Pipe with factory fitted pistachio rope connectors, end cap and filling neck.
- 2mtr x 3mm thick Galvanised backing plate, to allow for a variety of mounting options

GENERAL

- Rope Wick applicators are useful where there is a danger of chemical drift onto desirable plants for selective application to weeds growing above crops and pastures
- The wiping technique allows greater efficiency in weed control as the herbicide is applied directly to the weed target only, avoiding wastage
- The Wick applicator is fitted with specially constructed ropes. These ropes have a pistachio core, which allows the chemical to travel by capillary action

VARIOUS

- 2800mm Width with 22 Pistachio ropes
- 16L Reservoir

HERBICIDE APPLICATION:

- Herbicides with a low viscosity (thin and runny) may be prone to dripping, but it is preferable to use herbicides specially formulated. Wicks may also drip with plain water until the chemical is added.
