

DESCRIPTION

PRODUCT NAME:	SPREADER CRESCO FERTILISER PUSH ALONG 20SW
PART NUMBER:	CS-20SW
BARCODE:	5060885290335
CATEGORY:	A

PRODUCT FEATURES

20 ADJUSTABLE SETTINGS	Allows operators to spread various size material from Micro to Pellets.
BORDER CONTROL	Saves spreading product where it is not required, such as Patio's & Flower beds.
PNEUMATIC TYRES	Makes it easier to Push along the spreader all year round

BENEFITS

SPECIFICATIONS

Product overview

Where spreaders have consistently failed in the past is offering the ability to spread every type of **Fertilizer or Grass seed** with precision. Products from .5mm up to 5mm can be used through this spreader.

Fertilizers come in all shapes, sizes, and weights. As a result, they fly off the impellor in different ways. This can cause more material to be spread to the right than to the left, or vice versa. To even the amount of material spread on both sides, adjustments must be made to the application holes on the bottom. Our slider allows easy adjustment of the output holes.

Border control is achieved by pushing the border control slider across (as in the picture below), you can shut off one side of the spreader. This helps save patio paths and flower borders from the spread of material where it's not required.

Product Specifications

- 30Kg (Maximum) capacity, Poly UV Stabilised hopper
- Pneumatic wheels that provide improved grip and superior handling and balance all year round.
- Enhanced ground driven gearbox.
- Cushioned T on/off handle with solid rod linkage
- Powder coated frame with Parking stand.
- Spreads products from seed or micro granular to Pelleted Materials.
- Spreading width up to 4.5mtrs depending of product.
- 20 Adjustable settings to assist with accurate application rates & border control.
- Assembly & calibration instructions supplied.

Dimensions (Assembled)

- Height 850mm x Width 510mm x Length 900mm

Dimensions (Unassembled)

- Height 400mm x Width 600mm x Length 300mm

Weight

- 7.5Kg

Warranty 12 months
